

WEBSITE HANDOFF

Orchid Tree Website

A complete, mobile-first marketing site with a shared design system, an SEO-ready blog, a dining pre-order journey, and a full brand guideline. Everything you need to run it, grow it, and hand it on.

Prepared

June 2026

Live at

orchid-sigma.vercel.app

Code

github.com/shreyaraj13/orchid-tree-website

Orchid Tree

What was built

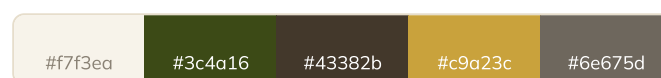

A fast, premium, mobile-first website built as hand-written HTML, CSS, and vanilla JavaScript on one shared design system. No framework, no build step, so it loads quickly and is simple to maintain. The work covers the full public site, a content engine for SEO, a guest dining journey, staff tooling, a complete brand guideline, and an SEO handover.

Delivered

- Nine public landing pages, one per intent
- A cinematic Stays page and a photo-led Restaurant page
- The Journal (blog) with three SEO articles
- A Plan Your Dining pre-order flow
- A staff kitchen dashboard
- A full brand guideline, written and visual
- An SEO handover guide
- Source published to GitHub

Design language

Deep olive on cream, gold accents, and a family of warm browns. Cormorant Garamond headings, Mulish body, a Sacramento script signature. Calm, editorial, restrained.

Cream · Olive · Ink brown · Gold · Body brown

The live site, every page

Base URL orchid-sigma.vercel.app. The root / serves Home.

Public pages

PAGE	ADDRESS
Home	/
Stays	/stays.html
Experiences	/experiences.html
Restaurant	/restaurant.html
Weddings	/weddings.html
Corporate	/corporate.html
Host with Us	/host-with-us.html
About	/about.html
FAQ	/faq.html
Privacy & Terms	/privacy-policy.html

Journal (blog, for SEO)

PAGE	ADDRESS
The Journal (index)	/blog.html
Weekend Getaways Near Bangalore	/blog-weekend-getaways-near-bangalore.html
Farm-to-Table Near Bangalore	/blog-farm-to-table-dining-near-bangalore.html
Intimate Wedding Venues Near Bangalore	/blog-intimate-wedding-venues-near-bangalore.html

Guest & booking flows

Plan Your Dining	/plan-your-dining.html
Book Packages	/book-packages.html
Guest / Room detail	/guest.html

Internal tools & reference

Kitchen Dashboard	/restaurant-dashboard.html
Admin	/admin.html
Brand Guidelines	/brand.html

The Journal and Host with Us are reached from the footer. The dining flow, staff tools, and brand pages are direct-link only and set to noindex.

Design system & brand

The complete design language is documented in two places, so anyone can keep new work consistent.

BRAND-GUIDELINES.md

The written reference: colour (including the warm brown family), typography, spacing, every component, motion, photography rules, voice and tone, iconography, SEO standards, data architecture, accessibility, and do/don'ts.

The living style guide, in the browser

A three-page visual guide that renders the real colours, type, and components:

- **Foundations** — </brand.html>
- **Components** — </brand-components.html>
- **Voice & Content** — </brand-voice.html>

House rules, never break these

- No exclamation marks. No em dashes or en dashes. Use commas and periods.
- Always write the brand as **Orchid Tree**, two words.
- Lead with a feeling, then one specific sensory detail. Keep text sparse, let photos carry.
- Reach for brown, not grey or black, for any shade, scrim, or shadow.

Search & SEO

The site is built to rank for local, high-intent searches near Bangalore. Full detail is in **SEO.md**. The headlines:

Already in place

- Unique title, description, canonical per page
- Open Graph and Twitter cards
- Structured data: LodgingBusiness, Restaurant, Service, FAQPage, BlogPosting, Breadcrumb
- Semantic HTML, clean keyword URLs, alt text
- Strong internal linking into the money pages
- Fast, mobile-first, HTTPS

Do first **ACTION**

- Optimise the Home page: add a canonical, a meta description, and structured data
- Add sitemap.xml and robots.txt (ready in SEO.md)
- Set up Google Search Console and Google Business Profile
- Decide the live domain and update all URLs, with 301 redirects
- Set admin and booking pages to noindex

The content engine

The Journal captures informational searches and links into Stays, Restaurant, and Weddings. Aim for two to four quality posts a month. Next keyword ideas: pet-friendly resorts near Bangalore, monsoon getaways, corporate offsite venues near Bangalore, resorts near Whitefield for couples.

Making changes & publishing

The site is static and hosted on Vercel. The source lives on GitHub.

To publish changes

Edit the HTML, then run **./deploy.sh** from the project folder. It syncs the pages and shared data into the linked Vercel folder and ships to production at orchid-sigma.vercel.app.

Source code

github.com/shreyaraj13/orchid-tree-website (public). Future changes: git add, git commit, git push.

Publishing a new blog post

Duplicate any blog-*.html file, change the title, description, canonical, structured data, and the article body, add a card to blog.html, add the file to deploy.sh, then deploy.

One menu, many surfaces

The dining content lives once in shared/menu.js and feeds the Restaurant page, the Plan Your Dining flow, and the kitchen dashboard. Rooms live once in shared/catalog.js.

Next steps & access

Recommended, in order

PRIORITY	ACTION
P1	Google Business Profile and Search Console, the highest-impact local SEO moves
P1	Home page SEO, sitemap.xml, robots.txt, and the live domain decision with redirects
P2	Connect a real backend so the menu, the guest pre-order link, and the kitchen dashboard sync live (currently front-end with WhatsApp dispatch)
P2	Replace placeholder lifestyle photos with real Orchid Tree photography, swap slots are labelled in the code
P3	Add web analytics and a steady stream of Journal posts

Accounts you will want to hold

- **Vercel** — hosting and deploys (project "orchid")
- **GitHub** — the source repository
- **Domain registrar** — for the live domain
- **Google Business Profile** and **Search Console**
- **Image library** — real photography to replace placeholders

Key facts

Address	Survey No. 7/2, Yelachamanahalli Village, Hoskote, Bangalore Rural, Karnataka 562114
